neutrophils, and pentoxifylline (editorial), 1103
pulmonary vascular permeability during, positron emission tomographic study of, 421
refinement of concept and redefinition of (pulmonary perspective), 724
septic, cachectin/TNF in (editorial), 1377
young, environmental exposure to tobacco smoke and lung function in, 296
Aerosols, hypoosmolar, acidity potentiates bronchoconstriction induced by, 35
Air
cold, dry, nasal challenge with, induces late-phase reaction, 400
hot, cold, and ambient, hyperpnea with, comparison of intraairway temperature in normal and asthmatic subjects after, 1533
pulmonary effects of blood replacement with perfluorochemical emulsion followed by exposure to, 435
Airflow
limitation, chronic
effects of, on gas exchange during maximal exercise in advanced cystic fibrosis, 1524
improvement in exercise endurance in patients with, using continuous positive airway pressure, 1510
severe, high-dose inhaled albuterol in, 850
weekly cuirass ventilation improves blood gases and inspiratory muscle strength in patients with, 617
obstruction
quartz but not iron oxide causes, in rats, 129
reversible, comparison of oral procaterol and albuterol in, 1504
severe chronic effect of unsupported arm exercise on ventilatory muscle recruitment in patients with, 856
Airway(s)
of allergic sheep with and without allergen-induced late responses, cellular markers of inflammation in, 1565
asthmatic, new role for histamine H_2-receptors in, 784
basement membrane, role of basal cells in adhesion of columnar epithelium to (note), 481
function, upper, improvement in, after weight loss in patients with obstructive sleep apnea, 1192
hyperresponsiveness, tachykinin receptor antagonist inhibits and inhibitor of tachykinin metabolism potentiates toluene diisocyanate-induced, in guinea pigs, 547
lesions, small, quartz but not iron oxide causes, in rats, 129
leukocyte infiltration, effect of cromolyn sodium and albuterol on, after allergen challenge of nonanesthetized guinea pigs, 1157
mechanics, pulmonary antigen challenge in rats passively sensitized with monoclonal IgE antibody induces immediate but not late changes in, 1152
microvascular leakage, inflammatory mediators involved in antigen-induced, in guinea pigs, 395
obstruction
chronic, role of CO_2 responsiveness and breathing efficiency in determining exercise capacity of patients with, 1488
respiratory mechanics during first day of mechanical ventilation in patients with pulmonary edema and, 355
stable fixed, effect of inhaled metaproterenol on exercise performance in patients with, 624
pressure, continuous positive
effect of, on respiratory sensation in patients with COPD during submaximal exercise, 1185
improvement in exercise endurance in patients with chronic airflow limitation using, 1510
severe acute respiratory failure managed with, 1480
rat, passive sensitization and antigen challenge increases vascular permeability in, 1295
reactivity, change in, and change in respiratory symptoms and medication, relation between, in community study, 530
response
to bronchodilator, clinical interpretation of, epidemiologic considerations in, 317
dichotomous, to exercise in asthmatic patients, 1164
size
and configuration, upper, effect of nasal airway positive pressure on, 969
and rate of pulmonary function decline in grain handlers, 1584
use of internal perimeter to compare, 136
smooth muscle responses *in vitro* and maximal bronchoconstriction *in vivo*, comparison of, in nonasthmatics, 321
upper, palate and hypopharynx are sites of inspiratory narrowing of, during sleep, 1542
Albuterol
Effect of, on early and late phase bronchoconstriction and airway leukocyte infiltration after allergen challenge of nonanesthetized guinea pigs, 1157
high-dose inhaled, in severe chronic airflow limitation, 850
and procaterol, oral, comparison of, in reversible airflow obstruction, 1504
Alcoholics, tuberculosis screening in (correspondence), 239
Allergen
challenge of nonanesthetized guinea pigs, effect of cromolyn sodium and albuterol on early and late phase bronchoconstriction and airway leukocyte infiltration after, 1157
-induced late responses, cellular markers of inflammation in airways of allergic sheep with and without, 1565
Allophycocyanin, use of, allows quantitative description by flow cytometry of alveolar macrophage surface antigens present in low numbers of cells, 1124
Alpha-1-antitrypsin deficiency, clinical features and history of destructive lung disease associated with, of adults with pulmonary symptoms, 327
Aluminum-based chemical products plant, radiographic abnormalities in relation to total dust exposure at, 90
Alveolar-capillary membrane, solute movement across, after intratracheally administered bleomycin in rats, 96
Alveolar macrophages. *See* Macrophages
Alveolitis
cryptogenic fibrosing, measures of inflammatory response in, 1234
dissociative correlations of lung interleukins 1 and 2 with intensity of, 645
lung T-lymphocyte, evaluation of effects of cyclosporine on, in active pulmonary sarcoidosis, 1242
American Journal of Respiratory Cell and Molecular Biology (editorial), 255

American Review of Respiratory Disease is not splitting (editorial), 257
American Thoracic Society
Chemotherapy of pulmonary mycosis, 1078
Clinical usefulness of skin testing in histoplasmosis, coccidioidomycosis, and blastomycosis, 1081
Future research in tuberculosis: research initiative in immunology of tuberculosis, 1327
Medical director of respiratory care (position paper), 1082
President's corner, 1036
Aminophylline and salbutamol, interactive effects of systemically administered, in patients with COPD, 1499
Angioedema, peripheral T-cell lymphoma presenting with (case report), 976
Angiotensin-converting enzyme activity, pulmonary, in oxygen-toxic sheep, 160
Antagonist, tachykinin receptor, inhibits and inhibitor of tachykinin metabolism potentiates toluene diisocyanate-induced airway hyperresponsiveness in guinea pigs, 547
Antibody
levels, specific IgE, patterns of improvement in, after cessation of exposure in occupational asthma caused by snow-crab processing, 807
-mediated detection, monoclonal, of lung cancer antigens in serum, 1434
monoclonal IgE, pulmonary antigen challenge in rats passively sensitized with, induces immediate but not late changes in airway mechanics, 1152
Antigen(s)
alveolar macrophage surface, use of allophycocyanin allows quantitative description by flow cytometry of, 1124
challenge
influx of inflammatory cells into nasal washings during late response to, effect of systemic steroid pretreatment on, 406
and passive sensitization increases vascular permeability in rat airways, 1295
pulmonary, in rats passively sensitized with monoclonal IgE antibody induces immediate but not late changes in airway mechanics, 1152
-induced
airway microvascular leakage, inflammatory mediators involved in, in guinea pigs, 395
edema formation, bronchoconstriction, and pulmonary vasospasm in isolated perfused guinea pig lung, 552
lung cancer, monoclonal antibody-mediated detection of, in serum, 1434
Antimycobacterial activity *in vivo* of LM427 (ribabutin), 1254
Antituberculosis
agents, various two-drug combinations of, susceptibility of *M. avium* complex to, 878
chemotherapy, comparative bioavailability of isoniazid, rifampin, and pyrazinamide administered in free combination and in fixed triple formulation designed for daily use in, 882, 886
Apnea
obstructive
alteration in pattern of, induced by changes in O_2- and CO_2-inspired concentrations, 16
sleep
automobile accidents involving patients with, 337
improvement in upper airway function after weight loss in patients with, 1192
syndrome, obstructive sleep, daytime pulmonary hypertension in patients with, 345
Arachidonic acid
alveolar epithelial cell–derived, rat alveolar macrophages synthesize leukotriene B_4 and 12-hydroxyeicosatetraenoic acid from, 928
endogenous, cyclooxygenase products from, in isolated dog and rabbit lungs, 383
metabolism in cultured alveolar macrophages from normal, atopic, and asthmatic subjects, 1134
pulmonary intravascular macrophages metabolize, *in vitro*, 936
Arteries, isolated proximal pulmonary, pharmacologic properties of, after seven-day exposure to *in vivo* hyperoxia, 945
Asbestos
-exposed
cohort, relation between pulmonary function, chest roentgenographic abnormalities, and smoking status, 272
workers, effect of tobacco smoking on presence of asbestosis at postmortem and on reading of irregular opacities on roentgenograms in, 1207
increased pulmonary gamma interferon production in, 278
-induced endothelial cell activation and injury, demonstration of fiber phagocytosis and oxidant-dependent toxicity in, 958
Asbestosis, effect of tobacco smoking on presence of, at postmortem, 1207
Asthma
acute, clinical features and outcome in patients with, presenting with hypercapnia, 535
allergic, production of interleukin-1 inhibitory factor by human alveolar macrophages from patients with, 40
arachidonic acid metabolism in cultured alveolar macrophages from subjects with, 1134
childhood, and adult lung function, 26
cold-induced, dissociation of temperature-gradient and evaporative heat loss during cold gas hyperventilation in, 540
comparison of intraairway temperatures in normal subjects and in patients with, after hyperpnea with hot, cold, and ambient air, 1553
dichotomous airway response to exercise in patients with, 1164
exercise
-induced
enhanced generation of leukotriene B_4 by neutrophils stimulated by unopsonized zymosan and by calcium ionophore after, 47
felodipine, a new calcium antagonist, modifies, 54
refractoriness after histamine inhalation in subjects with, 794
heterogeneity of leukotriene C_4 production by eosinophils from normal subjects and subjects with, 799
mild isocapnic hypoxia enhances bronchial response to methacholine in subjects with, 789
new role for histamine H_2-receptors in airways of patients with, 784
occupational, caused by snow-crab processing, patterns of improvement in spirometry, bronchial hyperresponsiveness, and specific IgE antibody levels after cessation of exposure, 807
reexamination of late response to exercise in (correspondence), 748
reflex decrease of histamine-induced bronchoconstriction after laryngeal stimulation in patients with, 1548
symptoms and bronchial hyperresponsiveness, international comparison of prevalence of, 524
what are the important experiments in (state of the art), 730
Atopy
arachidonic acid metabolism in cultured alveolar macrophages from subjects with, 1134
bronchial responsiveness, and atopy (editorial), 507
Atropine methylnitrate, development of subsensitivity to, 771
Automobile accidents involving patients with obstructive sleep apnea, 337
Bauxite refinery, radiographic abnormalities in relation to total dust exposure at, 90
Biopsy, ultrasonically guided needle, in diagnosis of mediastinal masses, 679
Blastomycosis, clinical usefulness of skin testing in (ATS statement), 1081
Bleomycin
-induced
fibrosis, BAL lipids during development of, in rats, 709
pulmonary fibrosis, effect of cigarette smoke on, in hamsters, 1276

solute movement across alveolar-capillary membrane after intratracheally administered, in rats, 96
Blood
flow, diaphragmatic, effect of hypoxia on, 1535
gases, weekly cuirass ventilation improves, in patients with chronic airflow limitation and hypercarbia, 617
and lung mononuclear phagocytes, differential expression of tumor necrosis factor/cachectin gene by, 659
monocyte(s)
inhibition of fibroblast proliferation, evidence for synergy between interleukin-1 and tumor necrosis factor in, 1595
spontaneous and stimulated release of tumor necrosis factor-alpha from, in miners with coal worker's pneumoconiosis, 1589
replacement with perfluorochemical emulsion followed by exposure to 85% O_2 and air, pulmonary effects of, 435
Book Reviews

of patients with ARDS, increased concentrations of leukotrienes in, 714
lipids during development of bleomycin-induced fibrosis in rats, 709
lymphocytes, phenotypical and functional analysis of, in patients with HIV infection, 1609
production of $1,25(OH)_2D_3$ by cells recovered by, and role of this metabolite in calcium homeostasis (case report), 984
quantification of cells recovered by, comparison of cytocentrifuge preparations with filter methods in, 74
Bronchoconstriction
antigen-induced, in isolated perfused guinea pig lung, 552
early and late phase, effect of cromolyn sodium and albuterol on, after allergen challenge of nonanesthetized guinea pigs, 1157
histamine-induced, reflex decrease of, after laryngeal stimulation in asthmatic patients, 1548
induced by hypoosmolar aerosols, acidity potentiates, 35
in vivo, maximal, and airway smooth muscle responses *in vitro*, comparison of, in nonasthmatics, 321
Bronchodilation, nonadrenergic, in normal subjects, 31
Bronchodilator, clinical interpretation of airway response to, epidemiologic considerations in, 317
Bronchofiberscopy-induced cough, attenuation of, by inhaled $beta_2$-adrenergic agonist, fenoteral, 805
Budesonide, high-dose inhaled, effect of, on calcium and phosphate metabolism and risk of osteoporosis, 57
Buthionine sulfoximine treatment, pulmonary effects of, and glutathione depletion in rats, 1471
Cachectin
gene/tumor necrosis factor, differential expression of, by blood and lung mononuclear phagocytes, 659
/TNF in septic shock and septic ARDS (editorial), 1377
Calcium
antagonist felodipine modifies exercise-induced asthma, 54
homeostasis, production of $1,25(OH)_2D_3$ by cells recovered by BAL and role of this metabolite in (case report), 984
ionophore
A23187, eicosanoid production in isolated perfused lungs stimulated with, 895
enhanced generation of leukotriene B_4 by neutrophils stimulated by, after exercise-induced asthma, 47
metabolism, effect of high-dose inhaled budesonide on, and risk of osteoporosis, 57
Cancer antigens, lung, in serum, monoclonal antibody-mediated detection of, 1434
Capreomycin kinetics in renal impairment and clearance by hemodialysis (note), 1312
Carbon dioxide
-inspired concentration, alteration in obstructive apnea pattern induced by changes in, 16
pressure, elevated, pulmonary rehabilitation in patients with COPD and, 1519
removal, partial extracorporeal, by artificial membrane lung in severe acute respiratory failure, 1480

responsiveness, role of, and breathing efficiency in determining exercise capacity of patients with chronic airway obstruction, 1488
Catheter(s)
pulmonary artery, dilemma of (correspondence), 488
telescoping plugged, diagnostic value of, in mechanically ventilated patients with bacterial pneumonia using the Metras catheter, 117
Cell(s)
activation and injury, endothelial, asbestos-induced, demonstration of fiber phagocytosis and oxidant-dependent toxicity in, 958
alveolar epithelial, rat alveolar macrophages synthesize leukotriene B_4 and 12-hydroxyeicosatetraenoic acid from arachidonic acid derived from, 928
basal, role of, in adhesion of columnar epithelium to airway basement membrane (note), 481
cultured endothelial, PGE_1 inhibits neutrophil adherence and neutrophil-mediated injury to, 915
dendritic, from rat lung are potent accessory cells, 121
differential, BAL, on microscope glass cover, 451
differentiation, alveolar type II, alkaline phosphatase as marker of, 1268
human
lung mast, adenosine potentiates mediator release from, 1143
respiratory epithelial, introduction of biologically active foreign genes into, using electroporation, 965
inflammatory, influx of, into nasal washings during late response to antigen challenge, effect of systemic steroid pretreatment on, 406
lung lavage, rapid detection of cytomegalovirus pneumonia from, 697
morphology, altered epithelial, and its relationship to BAL lipids during development of bleomycin-induced fibrosis in rats, 709
nasal polyp epithelial basophil/mast, and eosinophil colony-stimulating activity, effect of, is T-cell–dependent, 560
natural killer
do they help protect us from disease caused by pathogenic fungi (editorial), 510
role of, in histoplasmosis, 578
postconfluent cultured endothelial, studies on mechanism of decreased neutrophil adherence to, 1115
purified human lung mast, generation of leukotriene B_4 by, 389
recovered by BAL
production of $1,25(OH)_2D_3$ by, and role of this metabolite in calcium homeostasis (case report), 984
quantification of, comparison of cytocentrifuge preparations with filter method in, 74
supernatant, epithelial, effects of, on contractions of isolated canine tracheal smooth muscle, 780
use of allophycocyanin allows quantitative description by flow cytometry of alveolar macrophage surface antigens present in low numbers of, 1124
Cellular
influx and activation increase macrophage cytotoxicity and interleukin-1 elaboration during pulmonary inflammation in rats, 572
markers of inflammation in airways of allergic sheep with and without allergen-induced late responses, 1565
Chemotherapy
antituberculosis, comparative bioavailability of isoniazid, rifampin, and pyrazinamide administered in free combination and in a fixed triple formulation designed for daily use in, 882, 886
M. avium complex, synergism as rosetta stone for (editorial), 767
of pulmonary mycosis (ATS statement), 1078
Chest
roentgenographic abnormalities, pulmonary function, and smoking status, relation between, in asbestos-exposed cohort, 272
wall distortion, simultaneous quantification of, by multiple methods in preterm infants, 20
Child, previously healthy, fatal respiratory syncytial virus pneumonitis in (case report), 468
Childhood asthma and adult lung function, 26
Children
Hispanic, spirometric prediction equations for, in New Mexico, 1386
nine-year-old, parental smoking enhances bronchial responsiveness in, 518
and their nonsmoking mothers, comparison of prevalence of respiratory illnesses among, in Japan and Hong Kong, 290
Cigarettes. *See* Smoking
Coagulation, local abnormalities of, in sheep with oleic acid–induced lung injury, 1282
Coal worker's pneumoconiosis, miners with, spontaneous and stimulated release of tumor necrosis factor-alpha from blood monocytes of, 1589
Cobalt exposure and lung disease in tungsten carbide workers, 1220
Coccidioidomycosis, clinical usefulness of skin testing in (ATS statement), 1081
Colds, common, cough and, 305
Complement complex, terminal C5b-9, accentuated formation of, in plasma precedes development of ARDS, 368
Continuous flow systems and demand valves, inspiratory work of breathing during spontaneous ventilation using, 300

reference values for, in Japanese-American men 45 to 68 years of age, 1393
Fibrin deposition, alveolar, local abnormalities of, in sheep with oleic acid–induced lung injury, 1282
Fibrinolysis, local abnormalities of, in sheep with oleic acid–induced lung injury, 1282
Fibroblast(s)
differential proliferation of, cultured from normal and fibrotic human lungs, 703
proliferation
human alveolar macrophage and blood monocyte inhibition of, evidence for synergy between interleukin-1 and tumor necrosis factor, 1595
induced by silica-exposed human alveolar macrophages, 85
tumor necrosis factor interacts with interleukin-1 and interferons to inhibit, 652
Fibronectin, soluble, release of, containing extra type III domain during acute pulmonary injury mediated by oxidants or leukocytes *in vivo*, 167
Fibrosis
bleomycin-induced
bronchoalveolar lavage lipids during development of, in rats, 709
pulmonary, effect of cigarette smoke on, in hamsters, 1276
cystic
effects of chronic airflow limitation, increased dead space, and pattern of ventilation on gas exchange during maximal exercise in, 1524
pulmonary function in obligate heterozygotes for, 312
effect of crystal structure on mouse lung inflammation and, 445
Flow
characteristics, pressure, of commonly used heat-moisture exchangers, 675
cytometry, use of allophycocyanin allows quantitative description by, of alveolar macrophage surface antigens present in low numbers of cells, 1124
measurement, forced expiratory, effect of effort versus volume on (note), 1002
-volume
loop and main-stem bronchial obstruction (editorial), 1379
curves
forced expiratory, assessing lung function in infants from shape of (editorial), 514
forced expiratory, shape of, in infants, 590
Free radicals, generation of, from freshly fractured silica dust, potential role in acute silica-induced lung injury of, 1213
Fungi, pathogenic, do natural killer cells help protect us from disease caused by (editorial), 510
Gas
exchange, effects of
chronic airflow limitation, increased dead space, and pattern of ventilation on, during maximal exercise in advanced cystic fibrosis, 1524
posture, hydralazine, and nifedipine on, in patients with COPD, 1494
hyperventilation, cold, dissociation of temperature-gradient and evaporative heat loss during, in cold-induced asthma, 540
Gelsolin levels, depression of, and detection of gelsolin-actin complexes in plasma of patients with acute lung injury, 429
Genes, biologically active foreign, introduction of, into human respiratory epithelial cells using electroporation, 965
Genioglossus, EMG response of, to hypoxia during sleep, 610
Glutathione depletion and buthionine sulfoximine treatment, pulmonary effects of, in rats, 1471
Grain handler, airway size and rate of pulmonary function decline in, 1584
Granulocyte depletion prevents tumor necrosis factor–mediated acute lung injury in guinea pigs, 1300
Guinea pigs
granulocyte depletion prevents tumor necrosis factor–mediated acute lung injury, in, 1300
hemidiaphragm, isolated, effect of digoxin on contractility and fatigue of, 1180
inflammatory mediators involved in antigen-induced airway microvascular leakage in, 395
lung
antigen-induced edema formation, bronchoconstriction, and pulmonary vasospasm in isolated perfused, 552
hyperresponsiveness induced by active immunization in, and role of booster injection, 1572
nonanesthetized, effect of cromolyn sodium and albuterol on early and late phase bronchoconstriction and airway leukocyte infiltration after allergen challenge of, 1157
septic, attenuation of acute lung injury in, by pentoxifylline, 376
tachykinin receptor antagonist inhibits and inhibitor of tachykinin metabolism potentiates toluene diisocyanate–induced airway hyperresponsiveness in, 547
Hamster(s)
effect of cigarette smoke on bleomycin-induced pulmonary fibrosis in, 1276
lung interstitial macrophages, isolation and antigenic identification of, 908
Heat-moisture exchangers, pressure flow characteristics of commonly used, 675
Hemidiaphragms, isolated guinea pig and rat, effect of digoxin on contractility and fatigue of, 1180
Hemodialysis, capreomycin kinetics in renal impairment and clearance by (note), 1312
Hemodynamics, effect of posture, hydralazine, and nifedipine on, in patients with COPD, 1494
Heterozygotes, obligate, pulmonary function in, for cystic fibrosis, 312
Hispanic children and adults, spirometric prediction equations for, in New Mexico, 1386
Histamine
H_2-receptors, new role for, in asthmatic airways, 784
-induced bronchoconstriction, reflex decrease of, after laryngeal stimulation in asthmatic patients, 1548
inhalation
effect of, on human tracheal mucus velocity and bronchial mucociliary clearance, 775
exercise refractoriness after, in asthmatic subjects, 794
levels in BAL fluid in interstitial lung diseases, 1604
Histoplasmosis
clinical usefulness of skin testing in (ATS statement), 1081

role of natural killer cells in, 578
HIV infection, phenotypical and functional analysis of BAL lymphocytes in patients with, 1609
HLA typing in Hong Kong Chest Service/British Medical Research Council study of factors associated with breakdown to active tuberculosis of inactive pulmonary lesions, 1616
Homeostasis, calcium, production of $1,25(OH)_2D_3$ by cells recovered by BAL and role of this metabolite in (case report), 984
Hong Kong
Chest Service/British Medical Research Council study of factors associated with breakdown to active tuberculosis of inactive pulmonary lesions, HLA typing in, 1616
and Japan, comparison of prevalence of respiratory illnesses among nonsmoking mothers and their children in, 290
Hormone secretion, inappropriate antidiuretic, syndrome of, and pneumonia (editorial), 512
Hospital employees, annual tuberculosis screening of, lacks supporting data (editorial), 3
Hydralazine, posture, and nifedipine, effect of, on hemodynamics, ventilation, and gas exchange in patients with COPD, 1494
12-Hydroxyeicosatetraenoic acid, rat alveolar macrophages synthesize, from alveolar epithelial cell–derived arachidonic acid, 928
Hypercapnia
clinical features and outcome in patients with acute asthma presenting with, 535
refractory, complicating massive pulmonary embolism (case report), 466
Hypercarbia, weekly cuirass ventilation improves blood gases and inspiratory muscle strength in patients with, 617
Hyperpnea
with hot, cold, and ambient air, comparison of intraairway temperatures in normal and asthmatic subjects after, 1553
sustained, bracing arms increases capacity for, 106
Hyperoxia, *in vivo*, pharmacologic properties of isolated proximal pulmonary arteries after 7-day exposure to, 945
Hyperperfusion, mechanical, reversibility of diaphragm fatigue by, 604
Hyperreactivity of respiratory smooth muscle, human eosinophil major basic protein causes, 685
Hyperresponsiveness
lung, induced by active immunization, role of booster injection in, in guinea pig, 1572
ozone-induced bronchial, in rat is not accompanied by neutrophil influx or increased vascular permeability in trachea, 140
Hypertension
daytime pulmonary, in patients with obstructive sleep apnea syndrome, 345
familial primary pulmonary, heterogeneity of pathologic lesions in, 952
pulmonary, relationship between O_2 uptake and O_2 delivery in patients with, 69
Hypothyroidism presenting with respiratory muscle weakness (case report), 472
Hyperventilation, cold gas, dissociation of temperature-gradient and evaporative heat loss during, in cold-induced asthma, 540
Hypopharynx and palate are sites of inspiratory narrowing of upper airway during sleep, 1542
Hypoxia
effect of, on diaphragm blood flow, O_2 uptake, and contractility, genioglossal and diaphragmatic EMG response to, during sleep, 610
mild isocapnic, enhances bronchial response to methacholine in asthmatic subjects, 789
Immunization, active, lung hyperresponsiveness induced by, role of booster injection in, in guinea pig, 1572
Immunoglobulin E antibody, monoclonal, pulmonary antigen challenge in rats passively sensitized with, induces immediate but not late changes in airway mechanics, 1152
Infants
assessing lung function in, from shape of forced expiratory flow-volume curves (editorial), 514
influence of squeeze jacket on lung function in, 1258
preterm, simultaneous quantification of chest wall distortion by multiple methods in, 20
shape of forced expiratory flow-volume curves in, 590
Infection(s)
critical illness, and respiratory muscles (editorial), 258
HIV, phenotypical and functional analysis of BAL lymphocytes in patients with, 1609
nosocomial lung, detection of, in ventilated patients, using protected specimen brush and quantitative culture techniques, 110
upper respiratory tract, respiratory muscle weakness during, 5
viral, and respiratory muscle contractility (editorial), 1
Inflammation
cellular markers of, in airways of allergic sheep with and without allergen-induced late responses, 1565
mouse lung, effect of crystal structure on, 445
pulmonary, cellular influx and activation increase macrophage cytotoxicity and interleukin-1 elaboration during, in rats, 527
Inflammatory response in cryptogenic fibrosing alveolar, measures of, 1234
Infiltrates, diffuse pulmonary, peripheral T-cell lymphoma presenting with, 976
Inhalation
of cotton bract extract, bronchial responsiveness after, 1579
histamine, exercise refractoriness after, in asthmatic subjects, 794
of ozone produces decrease in superoxide anion radical production in mouse alveolar macrophages, 1129
Insufflation, constant O_2, in ventilatory failure model, 630
Intensive care unit, respiratory monitoring in (state of the art), 1625
Interferon
pulmonary gamma, increased production of, in asbestosis, 278
tumor necrosis factor interacts with, to inhibit fibroblast proliferation, 652
Interleukin
-1
elaboration, cellular influx and activation increase, during pulmonary inflammation in rats, 572
inhibitory factor, production of, by human alveolar macrophages from normal subjects and allergic asthmatic patients, 40
and tumor necrosis factor, evidence for synergy between, in human alveolar macrophage and blood monocyte inhibition of fibroblast proliferation, 1595
tumor necrosis factor interacts with, to inhibit fibroblast proliferation, 652
and -2, dissociative correlations of, with intensity of alveolitis, 645
in pulmonary sarcoidosis, 645
Intracellular monitoring of experimental respiratory failure (summary of collaborative studies), 484
Iodobenzyl-propanediamine, pulmonary retention of, effect of cigarette smoking on, in humans, 1429
Ionophore A23187, calcium, eicosanoid production in isolated perfused lungs stimulated with, 895
Iron oxide does not, but quartz does, cause airflow obstruction, emphysema, and small airways lesions in rats, 129
Irradiation, thoracic, corticosteroids prevent acute lung dysfunction caused by, in unanesthetized sheep, 1227
Isoniazid
rifampin
ethambutol, and streptomycin, minimal inhibitory concentrations of, against *M. tuberculosis* strains isolated before treatment in Taiwan (note), 999
and pyrazinamide, comparative bioavailability of, administered in free combination and in a fixed triple formulation designed for daily use in antituberculosis chemotherapy, 882, 886
therapy, 9-month, results of, for pulmonary tuberculosis under program conditions in San Francisco, 1622
for tuberculin reactor (correspondence), 488

Japan and Hong Kong, comparison of prevalence of respiratory illnesses among nonsmoking mothers and their children in, 290
Japanese-American men
correlates of FEV_1 and prevalence of pulmonary conditions in, 1398
45 to 68 years of age, reference values for FEV_1 in, 1393
Kaolin, effects of, on lung, 813
Larynx, stimulation of, reflex decrease of histamine-induced bronchoconstriction after, in asthmatic patients, 1548
Laser, Nd-YAG, treatment of malignant unilateral main-stem bronchial obstruction with, 1382
Lesions
inactive pulmonary, factors associated with breakdown to active tuberculosis of, 1616
pathologic, heterogeneity of, in familial primary pulmonary hypertension, 952
Leukemia, chronic lymphocytic, endobronchial Richter's syndrome, a rare manifestation of (case report), 980
Leukocyte
depletion with nitrogen mustard, lung injury and neutrophil density during air embolization in sheep after, 1444
infiltration, airway, effect of cromolyn sodium and albuterol on, after allergen challenge of nonanesthetized guinea pigs, 1157
release of soluble fibronectin containing extra type III domain during acute pulmonary injury mediated by, 167
Leukotriene(s)
B_4
enhance generation of, by neutrophils stimulated by unopsonized zymosan and by calcium ionophore after exercise-induced asthma, 47
generation of, by human fragments and purified lung mast cells, 389
rat alveolar macrophages synthesize, from alveolar epithelial cell–derived arachidonic acid, 928
C_4 production by eosinophils from asthmatic and normal subjects, heterogeneity of, 799
increased concentrations of, in BAL fluid of patients with ARDS, 714
Lipids, BAL, during development of bleomycin-induced fibrosis in rats, 709
Lung(s)
artificial membrane, severe acute respiratory failure managed with continuous positive airway pressure and partial extracorporeal CO_2 removal by, 1480
cancer antigens in serum, monoclonal antibody-mediated detection of, 1434
disease
and cobalt exposure in tungsten carbide workers, 1220
destructive, clinical features and history of, associated with alpha-1-antitrypsin deficiency of adults with pulmonary symptoms, 327
interstitial, BAL fluid histamine levels in, 1604
dysfunction caused by thoracic irradiation, acute, corticosteroids prevent, in unanesthetized sheep, 1227
effect of koalin on, 813
experimental diabetes and, *in vivo* connective tissue metabolism in, 284
fragments, human, generation of leukotriene B_4 by, 389
function
adult, and childhood asthma, 26
assessing, in infants from shape of forced expiratory flow-volume curves (editorial), 514
and environmental exposure to tobacco smoke in young adults, 296
influence of squeeze jacket on, in infants, 1258
indexes of, and alveolar macrophage plasminogen activator activity, association between, in young cigarette smokers, 1422
sex and race difference in development of, 1415
growth, postpneumonectomy compensatory (state of the art), 1314
inflammation, mouse, effect of crystal structure on, 445
injury
acute
attenuation of, in septic guinea pigs by pentoxifylline, 376
depression of gelsolin levels and detection of gelsolin-actin complexes in plasma of patients with, 429
granulocyte depletion prevents tumor necrosis factor–mediated, in guinea pigs, 1300
mepacrine impairs neutrophil response after, in rats, 1464
silica-induced, potential role of generation of free radicals from freshly fractured silica dust, 1213
and neutrophil density during air embolization in sheep after leukocyte depletion with nitrogen mustard, 1444
oleic acid–induced, local abnormalities of coagulation and fibrinolysis and alveolar fibrin deposition in sheep with, 1282
parenchymal, ineffectiveness of high-dose methylprednisolone in preventing, in patients with septic shock, 62
phorbol myristate acetate–induced, O_2 distribution and utilization after, 1454
interleukins 1 and 2, dissociative correlations of, with intensity of alveolitis, 645
interstitial macrophages, hamster, isolation and antigenic identification of, 908
isolated
dog and rabbit, cyclooxygenase products from endogenous arachidonic acid in, 383
perfused guinea pig, antigen-induced edema formation, bronchoconstriction, and pulmonary vasospasm in, 552
stimulated with calcium ionophore A23187, eicosanoid production in, 895
lavage cells, rapid detection of cytomegalovirus pneumonia from, 697
localized immune memory in, 565
mast cells, human, adenosine potentiates mediator release from, 1143
mechanisms of neutrophil recruitment to, by grain dust exposure, 921
models, rat, clearance of *Pseudomonas aeruginosa* in different, 1249
mononuclear phagocytes, differential expression of tumor necrosis factor/cachectin gene by, 659
normal and fibrotic human, differential proliferation of fibroblasts cultured from, 703
rat
dendritic cells from, are potent accessory cells, 121
relationship between receptor distribution in, and capacity of substance P to stimulate vascular permeability, 151
Lymphocytes, BAL, phenotypical and functional analysis of, in patients with HIV infection, 1609
Lymphoma, peripheral T-cell, presenting with angioedema and diffuse pulmonary infiltrates (case report), 976
Lysozyme, pulmonary, a secretory protein of type II pneumocytes in rats, 1261
Macrophages
alveolar, human, production of interleukin-1 inhibitory factor by, from normal subjects and allergic asthmatic patients, 40
cultured alveolar, arachidonic acid metabolism in, from normal, atopic, and asthmatic subjects, 1134
cytotoxicity, cellular influx and activation increase, during pulmonary inflammation in rats, 572
hamster lung interstitial, isolation and antigenic identification of, 908
inhibition of fibroblast proliferation, human alveolar, evidence for synergy between interleukin-1 and tumor necrosis factor in, 1595
mouse alveolar, inhalation of ozone produces decrease in superoxide anion radical production in, 1129
plasminogen activator activity, alveolar, and indexes of lung function, association between, in young cigarette smokers, 1422
pulmonary intravascular, metabolize arachidonic acid *in vitro*, 936

rat
alveolar, synthesize leukotriene B_4 and 12-hydroxyeicosatetraenoic acid from alveolar epithelial cell–derived arachidonic acid, 928
interstitial, prostaglandin synthesis and release by subpopulations of, 901
silica-exposed alveolar, fibroblast proliferation induced by, 85
surface antigen, alveolar, use of allophycocyanin allows quantitative description by flow cytometry of, 1124
Mediastinal masses, ultrasonically guided needle biopsy in diagnosis of, 679
Mepacrine impairs neutrophil response after acute lung injury in rats, 1464
Metabolism
in vivo connective tissue, in experimental diabetes and the lung, 284
tachykinin, inhibitor of, potentiates toluene diisocyanate–induced airway hyperresponsiveness in guinea pigs, 547
vitamin D, in tuberculosis (case report), 984
Metaproterenol, inhaled, effect of, on exercise performance in patients with stable fixed airway obstruction, 624
Methacholine
-induced nasal secretions, assessment of sources of protein in, in pathophysiology of rhinitis, 413
mild isocapnic hypoxia enhances bronchial response to, in asthmatic subjects, 789
Methylprednisolone, high-dose, ineffectiveness of, in preventing parenchymal lung injury and improving mortality in patients with septic shock, 62
Microscope glass cover, BAL cell differential on, 451
Monocyte(s)
blood, spontaneous and stimulated release of tumor necrosis factor-alpha from, in miners with coal worker's pneumoconiosis, 1589
inhibition, blood, of fibroblast proliferation, evidence for synergy between interleukin-1 and tumor necrosis factor, 1595
Mouse
alveolar macrophages, inhalation of ozone produces decrease in superoxide anion radical production in, 1129
lung inflammation and fibrosis, effect of crystal structure on, 445
Mucociliary clearance, bronchial, effect of inhaled histamine on, 775
Mucus velocity, human tracheal, effect of inhaled histamine on, 775
Muscarinic receptor, short tour around (editorial), 765
Muscle(s)
activity, inspiratory, inhibition of, during sleep, 8
airway smooth
muscarinic cholinergic inhibition of cyclic AMP accumulation in, and role of pertussis toxin-sensitive protein, 145
responses of *in vitro*, and maximal bronchconstriction *in vivo*, comparison of, in nonasthmatics, 321
contractility, respiratory, and viral infections (editorial), 1
dysfunction, respiratory, in Parkinson's disease, 266
function, respiratory, in myasthenia gravis, 867
isolated canine tracheal smooth, effects of epithelial cell supernatant on contractions of, 780
recruitment, ventilatory, effect of unsupported arm exercise on, in patients with severe chronic airflow obstruction, 856
respiratory
critical illness, and infection (editorial), 258
smooth, human eosinophil major basic protein causes hyperactivity of, 685
does it relieve fatigue or incipient fatigue (editorial), 516
shortening, smooth, use of internal perimeter to calculate, 136
strength
global inspiratory, value of sniff esophageal pressures in assessment of, 598
inspiratory, weekly cuirass ventilation improves, in patients with chronic airflow limitation and hypercarbia, 617
training, inspiratory, with pressure threshold breathing device in patients with COPD, 689
weakness, respiratory
hypothyroidism presenting with (case report), 472
during upper respiratory tract infection, 5
Myasthenia gravis, respiratory muscle function in, 867
Mycobacterium
avium complex
chemotherapy, synergism as rosetta stone for (editorial), 767
susceptibility of, to various two-drug combinations of antituberculosis agents, 878
fortuitum colonization, nosocomial, from a contaminated ice machine, 891
tuberculosis strains, isolated before treatment, minimal inhibitory concentrations of isoniazid, rifampin, ethambutol, and streptomycin against, in Taiwain (note), 999
Mycosis, pulmonary, chemotherapy of (ATS statement), 1078
Nasal
airway positive pressure, effect of, on upper airway size and configuration, 969
challenge with cold, dry air induces late-phase reaction, 400
polyp epithelial basophil/mast cell and eosinophil colony-stimulating activity, effect of, is T-cell–dependent, 560
secretions, assessment of sources of protein in methacholine-induced, in pathophysiology of rhinitis, 413
symptoms and resistance, SO_2 does not acutely increase, in subjects with rhinitis or with bronchial responsiveness to SO_2, 1559
washings, influx of inflammatory cells into, during late response to antigen challenge, effect of systemic steroid pretreatment on, 406
Neutrophil(s)
ARDS, and pentoxifylline (editorial), 1103
adherence
and neutrophil-mediated injury to cultured endothelial cells, PGE_1 inhibits, 915
to postconfluent cultured endothelial cells, decreased, studies on mechanism of, 1115
density and lung injury during air embolization in sheep after leukocyte depletion with nitrogen mustard, 1444
influx ozone-induced bronchial hyperresponsiveness in rat is not accompanied by, 140
recruitment, mechanisms of, to lung by grain dust exposure, 921
response, mepacrine impairs, after acute lung injury in rats, 1124
sequestration, endotoxin-induced pulmonary, pentoxifylline decreases, in dogs, 1106
stimulated by unopsonized zymosan and by calcium ionophore, enhanced generation of leukotriene B_4 by, after exercise-induced asthma, 47
New Mexico, spirometric prediction equations for Hispanic children and adults in, 1386
Nifedipine, posture, and hydralazine, effect of, on hemodynamics, ventilation, and gas exchange in patients with COPD, 1494
Nitrogen
and energy relationships in malnourished patients with emphysema, 636
mustard, lung injury and neutrophil density during air embolization in sheep after leukocytic depletion with, 1444
Nitroprusside, effects of, on pulmonary vascular pressure-flow plots in canine oleic acid pulmonary edema, 362
Oleic acid–induced lung injury, local abnormalities of coagulation and fibrinolysis and alveolar fibrin deposition in sheep with, 1282
Osteoporosis, risk of, and effect of high-dose inhaled budesonide on calcium and phosphate metabolism, 57
Oxidants, release of soluble fibronectin containing extra type III domain during acute pulmonary injury mediated by, 167
Oxygen
distribution and utilization after phorbol myristate acetate–induced lung injury, 1454
85%, pulmonary effects of blood replacement with perfluorochemical emulsion followed by exposure to, 435

-inspired concentration, alteration in obstructive apnea pattern induced by changes in, 16
insufflation, constant, in ventilatory failure model, 630
therapy, long-term, further recommendations for prescribing and supplying (conference report), 745
-toxic sheep, pulmonary angiotensin-converting enzyme activity in, 160
uptake
diaphragmatic, effect of hypoxia on, 1535
and O_2 delivery, relationship between, in patients with pulmonary hypertension, 69
Oxygenation, worsening, in mechanically ventilated patients, causes, mechanisms, and early detection (state of the art), 458
Ozone
ambient, effects of, on respiratory function in healthy adults exercising outdoors, 821
-induced bronchial hyperresponsiveness in rat is not accompanied by neutrophil influx or increased vascular permeability in trachea, 140
inhalation of, produces decrease in superoxide anion radical production in mouse alveolar macrophages, 1129
Palate and hypopharynx are sites of inspiratory narrowing of upper airway during sleep, 1542
Parkinson's disease, respiratory muscle dysfunction in, 266
Pentoxifylline
ARDS, and neutrophils (editorial), 1103
attenuation of acute lung injury in septic guinea pigs by, 376
decreases endotoxin-induced pulmonary neutrophil sequestration and extravascular protein accumulation in dogs, 1106
Peptide levels, atrial natriuretic, effect of exercise on, in patients with COPD (correspondence), 488
Permeability
alveolar epithelial, effects of phospholipase A_2 and its hydrolytic products on, 1196
vascular
increased, ozone-induced bronchial hyperresponsiveness in rat is not accompanied by, in trachea, 140
passive sensitization and antigen challenge increases, in rat airways, 1295
pulmonary, during ARDS, positron emission tomography study of, 421
relationship between receptor distribution in rat lung and capacity of substance P to stimulate, 151
Phagocytes, blood and lung mononuclear, differential expression of tumor necrosis factor–cachectin gene by, 659
Phagocytosis, fiber, demonstration of, in asbestos-induced endothelial cell activation and injury, 958
Phorbol myristate acetate–induced lung injury, oxygen distribution and utilization after, 1454
Phosphatase, alkaline, as marker of alveolar type II cell differentiation, 1268
Phosphate metabolism, effect of high-dose inhaled budesonide on, and risk of osteoporosis, 57
Phospholipase A_2 and its hydrolytic products, effects of, on alveolar epithelial permeability and elastase-induced emphysema, 1196
Plasma
accentuated formation of terminal C5b-9 complement complex in, precedes development of ARDS, 368
depression of gelsolin levels and detection of gelsolin-actin complexes in, of patients with acute lung injury, 429
Plasminogen activator activity, alveolar macrophage, and indices of lung function, association between, in young cigarette smokers, 1422
Pleura (state of the art), 184
Pneumonia
acute infectious, is accompanied by latent vasopressin-dependent impairment of renal water excretion, 583
bacterial, diagnostic value of telescoping plugged catheters in mechanically ventilated patients with, 117
cytomegalovirus, rapid detection of, from lung lavage cells, 697
and syndrome of inappropriate antidiuretic hormone secretion (editorial), 512
Pneumoconiosis, coal worker's, spontaneous and stimulated release of tumor necrosis factor-alpha from blood monocytes of miners with, 1589
Pneumocytes, type II, pulmonary lysozyme, a secretory protein of, in rats, 1261
Pneumonectomy, compensatory lung growth after (state of the art), 1314
Pneumonitis, fatal respiratory syncytial virus in previously healthy child (case report), 468
Positive end-expiratory pressure, use, abuse, and mystique of (pulmonary perspective), 475
Positron emission tomography study of pulmonary vascular permeability during ARDS, 421
Posture
effects of, on stimulated ventilation in quadriplegia, 101
hydralazine, and nifedipine, effect of, on hemodynamics, ventilation, and gas exchange in patients with COPD, 1494
Pressure-flow plots, vascular, pulmonary, in canine oleic acid pulmonary edema, effects of prostaglandin E_1 and nitroprusside on, 362
Procaterol and albuterol, oral, comparison of, in reversible airflow obstruction, 1504
Prostaglandin
-dependent and -independent mechanisms, tumor necrosis factor interacts with interleukin-1 and interferons to inhibit fibroblast proliferation via, 652
E_1
effects of, on pulmonary vascular pressure-flow plots in canine oleic acid pulmonary edema, 362
inhibits neutrophil adherence and neutrophil-mediated injury to cultured endothelial cells, 915
synthesis and release by subpopulations of rat interstitial macrophages, 901
Protected specimen brush, detection of nosocomial lung infection in ventilated patients using, 110
Protein(s)
accumulation, extravascular, pentoxifylline decreases, in dogs, 1106
assessment of sources of, in methacholine-induced nasal secretions in pathophysiology of rhinitis, 413
pertussis toxin-sensitive, role of, in muscarinic cholinergic inhibition of cyclic AMP accumulation in airway smooth muscle, 145
pulmonary surfactant-associated, proposed nomenclature of (pulmonary perspective), 990
secretory, of type II pneumocytes in rats, 1261
Pseudomonas aeruginosa, clearance of, in different rat lung models, 1249
Pulmonary
antibacterial defenses against *Staphylococcus aureus*, endotoxin-induced suppression of, 1439
disease
chronic obstructive
acute respiratory failure of (state of the art), 1006
cause of raised wedge pressure during exercise in, 350
continuous positive airway pressure, effect of, on respiratory sensation in patients with, during submaximal exercise, 1185
do sleep studies contribute to management of patients with, 341
evaluation of intermittent long-term negative-pressure ventilation in patients with, 1515
exercise, effect of, on atrial natriuretic peptide levels in patients with (correspondence), 488
inspiratory muscle training with pressure threshold breathing device in patients with, 689
interactive effects of systemically administered salbutamol and aminophylline in patients with, 1499

posture, hydralazine, and nifedipine, effect of, on hemodynamics, ventilation, and gas exchange in patients with, 1494
pulmonary rehabilitation in patients with, and elevated P_{CO_2}, 1519
evaluation of blood replacement with perfluorochemical emulsion followed by exposure to 85% O_2 or air, 435
function
chest roentgenographic abnormalities, and smoking status, relation between, in asbestos-exposed cohort, 272
decline, rate of, and airway size in grain handlers, 1584
in obligate heterozygotes for cystic fibrosis, 312
health care manpower, impact of AIDS on (editorial), 1101
injury, acute, release of soluble fibronectin containing extra type III domain during, 167
lesions, inactive, factors associated with breakdown to active tuberculosis of, 1616
rehabilitation in patients with COPD and elevated P_{CO_2}, 1519
retention of iodobenzyl-propanediamine, effect of cigarette smoking on, in humans, 1429
symptoms, clinical features and history of destructive lung disease associated with alpha-1-antitrypsin deficiency of adults with, 327
Pulmonologists, evaluation of competence in, 1034
Pyrazinamide, isoniazid, and rifampin, comparative bioavailability of, administered in free combination and in fixed triple formulation designed for daily use in antituberculosis chemotherapy, 882, 886
Quadriplegia, effects of posture on stimulated ventilation in, 101
Quartz but not iron oxide causes airflow obstruction, emphysema, and small airways lesions in rats, 129
Rabbit lung, isolated cyclooxygenase products from endogenous arachidonic acid in, 383
Rat(s)
airways, passive sensitization and antigen challenge increases vascular permeability in, 1295
alveolar macrophages synthesize leukotriene B_4 and 12-hydroxyeicosatetraenoic acid from alveolar epithelial cell–derived arachidonic acid, 928
bronchoalveolar lavage lipids during development of bleomycin-induced fibrosis in, 709
cellular influx and activation increase macrophage cytotoxicity and interleukin-1 elaboration during pulmonary inflammation in, 572
effects of sepsis on diaphragmatic function in, 260
hemidiaphragm, isolated, effect of digoxin on contractility and fatigue of, 1180
interstitial macrophages, prostaglandin synthesis and release by subpopulations of, 901
lung
dendritic cells from, are potent accessory cells, 121
models, clearance of *Pseudomonas aeruginosa* in different, 1249
relationship between receptor distribution in, and capacity of substance P to stimulate vascular permeability, 151
passively sensitized with monoclonal IgE antibody, pulmonary antigen challenge in, induces immediate but not late changes in airway mechanics, 1152
pulmonary
effects of buthionine sulfoximine treatment and glutathione depletion in, 1471
lysozyme, a secretory protein of type II pneumocytes in, 1261
ozone-induced bronchial hyperresponsiveness in, is not accompanied by neutrophil influx or increased vascular permeability in trachea, 140
quartz but not iron oxide causes airflow obstruction, emphysema, and small airways lesions in, 129
solute movement across alveolar-capillary membrane after intratracheally administered bleomycin in, 96
Renal impairment and clearance by hemodialysis, capreomycin kinetics in (note), 1312
Respiratory
care, medical director of (ATS position paper), 1082
Cell and Molecular Biology, American Journal of (editorial), 255
Disease, American Journal of, is not splitting (editorial), 257
failure
acute, of chronic obstructive pulmonary diseases (state of the art), 1006
experimental, intracellular monitoring of (summary of collaborative studies), 484
severe acute, managed with continuous positive airway pressure and partial extracorporeal CO_2 removal by artificial membrane lung, 1480
function, effect of ambient ozone on, in healthy adults exercising outdoors, 821
illnesses among nonsmoking mothers and their children in Japan and Hong Kong, comparison of prevalence of, 290
mechanics during first day of mechanical ventilation in patients with pulmonary edema and chronic airway obstruction, 355
monitoring in intensive care unit (state of the art), 1625
muscle(s)
contractility and viral infections (editorial), 1
dysfunction in Parkinson's disease, 266
rest, does it relieve fatigue or incipient fatigue (editorial), 516
weakness
hypothyroidism presenting with (case report), 472
during upper respiratory tract infections, 5
critical illness, and infection (editorial), 258
sensation, effect of continuous positive airway pressure on, in COPD during submaximal exercise, 1185
symptoms
and cigarette smoking, effect of, on natural history of forced expiratory volumes, 837
and medication, relation between change in airway reactivity and change in, in community study, 530
Rhinitis
pathophysiology of, assessment of sources of protein in methacholine-induced nasal secretions in, 413
SO_2 does not acutely increase nasal symptoms and resistance in subjects with, 1559
Richter's syndrome, endobronchial, a rare manifestation of chronic lymphocytic leukemia (case report), 980
Rifabutin, antimycobacterial activity *in vivo* of, 1254
Rifampin, isoniazid
ethambutol, and streptomycin, minimal inhibitory concentrations of, against *M. tuberculosis* strains isolated before treatment in Taiwan (note), 999
and pyrazinamide, comparative bioavailability of, in free combination and in fixed triple formulation designed for daily use in antituberculosis chemotherapy, 882, 886
therapy, 9-month, results of, for pulmonary tuberculosis under program conditions in San Francisco, 1622
Roentgenograms, effect of tobacco smoking on reading of irregular opacities on, in asbestos-exposed workers, 1207
Salbutamol and aminophylline, interactive effects of systemically administered, in patients with COPD, 1499
San Francisco, results of 9-month isoniazid-rifampin therapy for pulmonary tuberculosis under program conditions in, 1622
Sarcoidosis
active pulmonary, evaluation of effects of cyclosporine on lung T-lymphocyte alveolitis of, 1242
pulmonary, interleukins in, 645
Sensitization, passive, and antigen challenge increases vascular permeability in rat airways, 1295
Sepsis
effects of, on diaphragmatic function in rats, 260
guinea pigs with, pentoxifylline attenuates acute lung injury in, 376
Septic shock
ineffectiveness of high-dose methylprednisolone in preventing parenchymal lung injury and improving mortality in patients with, 62
and septic ARDS, cachectin/TNF in (editorial), 1377

Serum, monoclonal antibody–mediated detection of lung cancer antigens in, 1434
Sheep
allergic, with and without allergen-induced late responses, cellular markers of inflammation in airways of, 1565
lung injury and neutrophil density air embolization in, after leukocyte depletion with nitrogen mustard, 1444
with oleic acid–induced lung injury, local abnormalities of coagulation and fibrinolysis and alveolar fibrin deposition in, 1282
oxygen-toxic, pulmonary angiotensin-converting enzyme activity in, 160
unanesthetized, corticosteroids prevent acute lung dysfunction caused by thoracic irradiation in, 1227
Silica
-exposed human alveolar macrophages, fibroblast proliferation induced by, 85
-induced lung injury, potential role of generation of free radicals from freshly fractured silica dust in, 1213
Skin testing, clinical usefulness of, in histoplasmosis, coccidioidomycosis, and blastomycosis (ATS statement), 1078
Sleep
apnea, obstructive, improvement in upper airway function after weight loss in patients with, 1192
genioglossal and diaphragmatic EMG responses to hypoxia during, 610
inhibition of inspiratory muscle activity during, 8
REM, breathing pattern and eye movement density during, in humans, 874
palate and hypopharynx are sites of inspiratory narrowing of upper airway during, 1542
studies, do they contribute to management of patients with severe COPD, 341
Smoke
cigarette
augmentation of elastase-induced emphysema by, and effects of reduced nicotine content, 1201
effect of, on bleomycin-induced pulmonary fibrosis in hamsters, 1276
tobacco, environmental exposure to, and lung function in young adults, 296
Smokers, young cigarette, association between alveolar macrophage plasminogen activator activity and indexes of lung function in, 1422
Smoking
cigarette, effect of
on natural history of forced expiratory volumes, 837
on pulmonary retention of iodobenzyl-propanediamine in humans, 1429
parental, enhances bronchial responsiveness in nine-year-old children, 518
passive, and bronchial responsiveness and atopy (editorial), 507
status, pulmonary function, and chest roentgenographic abnormalities, relation between, in asbestos-exposed cohort, 272
tobacco, effect of, on presence of asbestosis at postmortem and on reading of irregular opacities on roentgenograms in asbestos-exposed workers, 1207
Snow-crab processing, occupational asthma caused by, patterns of improvement in spirometry, bronchial hyperresponsiveness, and specific IgE antibody levels after cessation of exposure to, 807
Spirometry
analysis of data from, from national sample of healthy persons 6 to 24 years of age, 1405
patterns of improvement in, after cessation of exposure in occupational asthma caused by snow-crab processing, 807
prediction equations for Hispanic children and adults in New Mexico using, 1386
Squeeze jacket, influence of, on lung function in infants, 1258
Staphylococcus aureus, endotoxin-induced suppression of pulmonary antibacterial defenses against, 1439
STATE OF THE ART
Acute respiratory failure of chronic obstructive pulmonary diseases, 1006
Asthma—what are the important experiments, 730
The pleura, 184
Postpneumonectomy compensatory lung growth, 1314
Respiratory monitoring in the intensive care unit, 1625
Worsening oxygenation in mechanically ventilated patients: causes, mechanisms, and early detection, 458
Steroid pretreatment, systemic, effect of, on influx of inflammatory cells into nasal washings during late response to antigen challenge, 406
Substance P, relationship between receptor distribution in rat lung and capacity of, to stimulate vascular permeability, 151
Sulfur dioxide does not acutely increase nasal symptoms or nasal resistance in subjects with rhinitis or with bronchial responsiveness to SO_2, 1559
Supernatant, epithelial cell, effects of, on contractions of isolated canine tracheal smooth muscle, 780
Superoxide anion radical production, inhalation of ozone produces decrease in, in mouse alveolar macrophages, 1129
Surfactant-associated pulmonary proteins, proposed nomenclature for (pulmonary perspective), 990
Syndrome,
acquired immunodeficiency, impact of, on pulmonary health care manpower (editorial), 1101
adult respiratory distress
accentuated formation of terminal C5b-9 complement complex in plasma precedes development of, 368
expanded definition of (pulmonary perspective), 720
increased concentrations of leukotrienes in BAL fluid of patients with, 714
refinement of concept and redefinition of (pulmonary perspective), 724
septic, cachectin/TNF in (editorial), 1377
endobronchial Richter's, a rare manifestation of chronic lymphocytic leukemia (case report), 980
obstructive sleep apnea, daytime pulmonary hypertension in patients with, 345
inappropriate antidiuretic hormone secretion, pneumonia and (editorial), 512
Synergism: rosetta stone for *M. avium* complex chemotherapy (editorial), 767
Tachykinin receptor antagonist inhibits and inhibitor of tachykinin metabolism potentiates toluene diisocyanate–induced airway hyperresponsiveness in guinea pigs, 547
Taiwan, minimal inhibitory concentrations of isoniazid, rifampin, ethambutol, and streptomycin against *M. tuberculosis* strains isolated before treatment in (note), 999
Temperature-gradient and evaporative heat loss, dissociation of, during cold gas hyperventilation in cold-induced asthma, 540
Theophylline and diaphragmatic contractility, dose-response relationship in, 1532
Thoracic asymmetry, severe, fabrication of customized cuirass for patients with (correspondence), 488
Thrombolytic therapy of massive pulmonary embolism, reperfusion pulmonary edema after (case report), 1308
Tight junctional complexes, development, organization, and function of, in tracheal epithelium of infant ferrets, 666
Tissue metabolism, connective, in experimental diabetes and the lung, 284
Toluene diisocyanate–induced airway hyperresponsiveness, tachykinin receptor antagonist inhibits and inhibitor of tachykinin metabolism potentiates, in guinea pigs, 547
Tomography, positron emission, study of pulmonary vascular permeability during ARDS by, 421
Toxicity, oxidant-dependent, demonstration of, in asbestos-induced endothelial cell activation and injury, 958
Trachea, ozone-induced bronchial hyperresponsiveness in rat is not accompanied by neutrophil influx of increased vascular per-

meability in trachea, 140
Transfer factor (correspondence), 1084
Tuberculin reactor, isoniazid for (correspondence), 488
Tuberculosis
active, factors associated with breakdown to, of inactive pulmonary lesions, 1616
future research in (ATS conference on tuberculosis research), 1327
identification of effective vaccine against (pulmonary perspective), 479
pulmonary, results of 9-month isoniazid-rifampin therapy for, under program conditions in San Francisco, 1622
screening
in alcoholics and drug addicts (correspondence), 289
annual, of hospital employees lacks supporting data (editorial), 3
role of vitamin D in (editorial), 768
vitamin D metabolism in (case report), 984
Tumor necrosis factor
-alpha (TNF), spontaneous and stimulated release of, from blood monocytes of miners with coal worker's pneumoconiosis, 1589
/cachectin gene, differential expression of, by blood and lung mononuclear phagocytes, 659
interacts with interleukin-1 and interferons to inhibit fibroblast proliferation, 652
and interleukin-1, evidence for synergy between, in human alveolar macrophage and blood monocyte inhibition of fibroblast proliferation, 1595
-mediated acute lung injury, granulocyte depletion prevents, in guinea pigs, 1300
Tungsten carbide workers, cobalt exposure and lung disease in, 1220
Vaccine against tuberculosis, identification of effective (pulmonary perspective), 479
Vasopressin-dependent impairment of renal water excretion, latent, accompanies acute infectious pneumonia, 583
Vasospasm, antigen-induced pulmonary, in isolated perfused guinea pig lung, 552
Ventilation
effect of posture, hydralazine, and nifedipine on, in patients with COPD, 1494
intermittent long-term negative-pressure, evaluation of, in patients with severe COPD, 1515
mechanical
diagnostic value of telescoping plugged catheters in patients with bacterial pneumonia receiving, 117
respiratory mechanics during, in patients with pulmonary edema and chronic airway obstruction, 355
worsening oxygenation in patients receiving, causes, mechanisms, and early detection (state of the art), 458
nonconventional methods of (pulmonary perspective), 175
patients receiving, detection of nosocomial lung infection in, using protected specimen brush and quantitative culture techniques, 110
pattern of, and its effect on gas exchange during maximal exercise in advanced cystic fibrosis, 1524
spontaneous, inspiratory work of breathing during, using demand valves and continuous flow systems, 300
stimulated, effects of posture on, in quadriplegia, 101
synchronized intermittent mechanical, external work output and force generation during, 1169
weekly cuirass, improves blood gases and inspiratory muscle strength in patients with chronic airflow limitation and hypercarbia, 617
Ventilatory
impairment, reexamination of risk factors for, 829
failure, constant oxygen insufflation in model of, 630
Vitamin D
metabolism in tuberculosis (case report), 984
role of, in tuberculosis (editorial), 768
Volume(s)
forced expiratory, natural history of, 837
versus effort, effect of, on forced expiratory flow measurement (note), 1002
Water excretion, renal, acute infectious pneumonia is accompanied by latent vasopressin-dependent impairment of, 583
Wedge pressure, raised, cause of, during exercise in COPD, 350
Workers
asbestos-exposed, effect of tobacco smoking on presence of asbestosis at postmortem and on reading of irregular opacities on roentgenograms in, 1207
with coal worker's pneumoconiosis, spontaneous and stimulated release of tumor necrosis factor-alpha from blood monocytes of, 1589
grain, airway size and rate of pulmonary function decline in, 1584
tungsten carbide, cobalt exposure and lung disease in, 1220
Zymosan, unopsonized, enhanced generation of leukotriene B_4 by neutrophils stimulated by, after exercise-induced asthma, 47
